DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-6 are rejected under 35 U.S.C. 102(e) as being anticipated by Andrew et al. (“Andrew”, US 6,990,333).

As per claim 1, Andrew teaches a method of changing the setting of user setting menu options in a mobile terminal, the user setting menu options being menu options which a user can set, comprising the steps of:

registering the user setting menu options selected by the user from among menu options available in the mobile terminal as setting categories in connection with set values selected by the user in a scheduling setting group (col.4, lines 24-48);

setting a scheduling timer to a timing value for changing the settings of selected user setting menu options (col.5, lines 1-32);

activating the scheduling timer when a scheduling setting mode is set (col.5, lines 33-44);
and

changing the user setting menu options to the set values of the setting categories upon expiration of the timing value of the scheduling timer (col.7, lines 55-67).

Art Unit: 2174

As per claim 2, Andrew teaches the method wherein the scheduling timer is selected from the group of an appointment timer set at a first predetermined time, a length timer for timing when a second predetermined time elapses, a period timer for timing a predetermined period having start and end times, and a repetition timer for timing a predetermined time interval (col.5, lines 45-67; col.6, lines 1-30).

As per claim 3, Andrew teaches the method wherein the changing step further comprises the steps of:

storing the set values of the user setting menu options corresponding to the setting categories of the scheduling setting group at the start time of the predetermined period of the period timer (col.6, lines 52-67);

changing the set values of the user setting menu options to the set values of the scheduling setting group (col.6, lines 52-67); and

returning the user setting menu options to the stored set values when the end time of the predetermined period of the period timer is reached (col.7, lines 55-67).

As per claim 4, Andrew teaches a method of changing the setting of user setting menu options in a mobile terminal, the user setting menu options being menu options which a user can set, comprising the steps of:

registering the user setting menu options selected by the user from among menu options available in the mobile terminal as setting categories in connection with set values selected by the user in a scheduling setting group having a unique identifier (ID) (col.4, lines 24-48);

Art Unit: 2174

setting a scheduling timer to a timing value for changing the settings of selected user setting menu options registered as setting categories in a scheduling setting group selected from at least one scheduling setting group (col.5, lines 1-32);

activating the scheduling timer when a scheduling setting mode is set (col.5, lines 33-44);
and

changing the user setting menu options in the selected scheduling setting group to the set values of the setting categories upon expiration of the timing value of the scheduling timer (col.7, lines 55-67).

Claims 5-6 are similar in scope to claims 2-3 respectively, and are therefore rejected under similar rationale.
